

# **DRÄXLMAIER Group Energy Policy**

# Energy Policy

## Preamble

Conscious of its responsibility to present and future generations and aligned with sustainable development goals, the DRÄXLMAIER Group is committed to promoting a safe, economical, and environmentally friendly energy policy.

## Content

The DRÄXLMAIER Group is committed to the structural and sustainable reduction of its operational energy consumption based on:

- relevant laws and regulations,
- our corporate strategy LEADER, which is grounded in our corporate values and strategic goals,
- our responsibility for sustainable management along the value chain,
- perspectives for optimizing internal energy-related processes.

The realization of the energy policy is carried out by implementing an appropriate energy management system in which:

- energy consumption is systematically evaluated,
- energy flows are recorded and kept up to date,
- energy-saving measures are planned and introduced,
- the results of the energy-saving measures are evaluated at regular intervals,
- the planned activities to improve energy efficiency are continuously updated.

A central energy manager is appointed, and an annual budget is provided to implement the energy policy. The energy manager is supported by an energy team, enabling the implementation of the energy policy internationally, particularly with the involvement of energy-relevant departments.

The prerequisite for this is that available resources and time are used as effectively as possible, and that a pragmatic approach is found.

In order to fulfill the energy policy, the DRÄXLMAIER Group will continuously ensure:

- compliance with the relevant laws and regulations,
- taking appropriate and effective technological, organizational, or behavioral measures that improve energy efficiency and reduce energy consumption,
- measuring, recording, and reviewing various energy consumption figures,
- actively involving the workforce in implementing the energy policy,
- carefully assessing energy-efficient alternatives in due course.

By continuously scrutinizing and developing our energy policy, we ensure that our aspirations keep pace with our business activities and account for future challenges.

The content of the energy policy is documented and communicated across all levels within the organization, reviewed at regular intervals, and updated as necessary.

## Scope

The contents of this policy apply to all employees of the DRÄXLMAIER Group worldwide. Furthermore, the DRÄXLMAIER Group requires its suppliers to respect and take account of them in their policies.
